[Pdf Document Management Software Mac](#)

Turn your iPhone into a jet Fast multi-page document scanner with SharpScan!

Recognize and Share text in Images on 50+ languages (OCR).

Perfect companion for busy users, SharpScan automatically produces small, clear, and legible standard PDF documents from any photos at a very high speed.

Are you on the go and urgently need to send an expenses receipt, business card, presentation slide, or any other document to colleagues? SharpScan offers a perfect solution to your problem. Check it out!

#### What makes SharpScan unique

##### Made with speed and quality in mind

Perfect combination of image processing Speed and Quality - takes less than 3 seconds from the image shot to a ready-to-use document without any annoying manual adjustments.

##### Every pixel counts

Highest image enhancement quality - get rid of noise, shadows, distortions, and other shooting artifacts at full resolution.

Special mode for strong shadows processing - every detail will be revealed.

##### Safety assurance

Feel free to experiment with your documents - with Non-Destructive image editing you can always revert to the original image.

E.g. you can share a document as a tiny Black & White PDF and then convert it to full color with no pixel loss.

##### Size does matter

True Black & White image processing to produce tiny documents with lossless compression. Compare to ordinary JPEG: ~20x smaller with no pixel lost for compression. Can scarcely be overestimated in case of a slow or expensive network connection.

##### Working smart

Fully automatic document boundary detection, cropping, and perspective correction without manual interaction. Of course manual adjustments are also possible.

##### PDF power

Create industry standard PDF documents.

- Manage document and pages: Move, Copy, and Merge.
- Protect documents with passwords.
- Automatic page size and orientation detection.
- Custom page sizes including flexible (like long receipts).
